JM

Rachael,

Attached is a copy of the spring 2022 report of the CUCEA-CUCRA Joint Benefits Committee. This group includes the leadership of both organizations as well as others who share much experience with this subject matter. As we discussed last year, in the past, such reports were transmitted to UCOP with no clear understanding of who was on point to coordinate a response. As part of my dowry for service as HBAC chair, you agreed to ensure there is a response to the report and that efforts would be made for that to be in time for our biannual conference (upcoming April 27 with President Drake participating).

Last fall Bernadette Green was a very engaged participant in responding to changes within her organization. This spring, with questions about Navitus and VIA Benefits we would appreciate a senior representative to address those issues. And, of course, Bernadette will again report on progress in rebuilding RASC. We also anticipate Susan Pon-Gee will be able to report on the funding augmentations plan for the Healthcare Facilitator program.

We hope all is well as you and your team continue to juggle the many issues that surround the best system of public higher education in the world.
